We have identified features that are important to enabling primary care transformation. These are aligned with the four characteristics that define the PCH model:

1. The PCH is developed, implemented and led by providers while being supported by commissioners
2. Providers release benefits by working at a the right level to effect change
3. The PCH model fosters collaboration throughout the system
4. Staff are activated to become the drivers of positive change
Some quotes from what we heard

“I feel that working collaboratively as part of an integrated, multi-agency team we have been able to make a real difference to the patient experience and in many cases we have had a huge positive impact on patients’ lives. How do we know this? Because the patients have told us so”

Partnership Officer, Bassetlaw Community and Voluntary Service

“This has opened numerous doors and conversations with patients and partners across the wider system to develop opportunities for more joined up care”

GP, Beacon Medical Group

“There’s a real energy for change and new ideas can be implemented quickly”

GP, Larwood and Bawtry

“I feel it makes a massive difference to patient care and patient experience. Our Meridian surveys confirms this”

Support Worker, Thanet

“There is a ‘happy buzz’ at our practice since PCH has started”

Practice pharmacist, Larwood and Bawtry

“We are more joined up and this has positively impacted our patients across the whole system”

District nurse, Larwood and Bawtry
